説明			
The pdf export generates the issue id twice:			
!double_issueID.png!			
I added a patch that fixes this bug.			
journals			
Regression.			
Not sure the patch is complete?			
This patch should be complete now. It also includes some code improvements: <code>.inject(0) { s,v s += v}</code> is replaced by <code>.inject(:+)</code>

Looks fine. What Ruby version did you test it with, please?			
Tested on ruby 1.9.2 and 1.9.3. The code improvement should also work on 1.8.7: http://stackoverflow.com/questions/1538789/how-to-sum-array-members-in-ruby			
Looks like <code>@.inject(0) { s,w s += w}@</code> should be replaced by <code>@.inject(0, :+)@</code> rather than <code>@.inject(:+)@</code>			
You are right.			
Fixed with r11693.			
Merged from trunk.
