

Issue Filtering 'Assignee = <<me>>' shows group issues, but 'Assignee = Bob' does not

説明

Environment:

| | |
|------------------|--------------------|
| Redmine version | 2.3.0.stable |
| Ruby version | 1.8.7 (i686-linux) |
| Rails version | 3.2.13 |
| Environment | production |
| Database adapter | PostgreSQL |

Redmine plugins:
no plugin installed

Contrast these two different results of what should be an identical search (I am 'Phil Miller'). They should both show issues assigned to groups of which I am a member, but only the 'special' <> search actually does.

journals

Are all issues from same project? May the project focus switched?

There's only one project in the Redmine instance. Its name appears in the title and heading of both search result pages. When I add the 'Project' column, that project is listed for all displayed issue in both cases.

Could you verify if PPL is defined as a group?

Yes, PPL is defined as a group.

Ok, and you (Phil Miller) are member of this group? Yes?

Yes, I am.

So everything works right. It's a feature, not a defect. If you are a member of PPL, this issue is assigned to you, too. If you agree, please set this issue to resolved.

I think you may be interpreting my complaint backwards. The latter search, for 'Assigned to = Phil Miller' should also show the issues assigned to PPL, just like 'Assigned to = <>' does. I want the group issues to appear in searches on individuals who are members of

relevant groups.

You are right. When you are logged as 'Phil Miller' and searching for 'Phil Miller' then <> and 'Phil Miller' should give same result.

+1

As an administrator :

If i search projects on which Phil Miller works, it should show projects where Phil is assignee and also projects where the group which he belongs is assigned...

Do we have any way to overcome this problem?

My situation:

I use a reminder plugin which remind me all my issues satisfying some criteria. The problem is that it sends only issues assigned to me, but not those assigned to the group I belong to.

I think that it should be configurable, or add checkbox (with groups).

+1

version 3.2.1-stable is also affected

+1

+1

The behavior is useful for me. I always make use of this behavior when I want to see only issues assigned to me excluding issues assigned to groups.

related_issues

relates,Closed,13006,Filter "Assignee's group" doesn't work with group assignments

relates,Closed,26078,List of issues per assignee doesn't match in profile

relates,Closed,25212,User profile should link to issues assigned to user or his groups
