説明 When uusing the REST API to update the versions (using the xml format), the custom fields are ignored if the syntax is used as described on http://www.redmine.org/projects/redmine/wiki/Rest_api After modifying the @app/model/version.rb@ similar to r9783 it worked. The solution is therefore pretty simple. I only checked to update the versions. Maybe this bug is also present for other models. journals Fixed in r11760 with a test, I've checked the other models. Thanks for pointing this out. Merged.
