When copying issues which have subtasks in other (sub) projects not the same as master issue, the subtask issues are copied into the project of the master issue, instead of the project they are currently inside.

e.g.

Projects

Horse
¦-  Foal
¦-  Pony

Issues

Horse  -  #1  Hooves
Foal          ¦-  #2  Tail
Pony          ¦-  #3  Fetlock

Copy @#1 - Hooves@ with subtasks and you get

Horse          #4  Copy  of  Hooves
Horse          ¦-  #5  Tail
Horse          ¦-  #6  Fetlock

Expected

Horse          #4  Copy  of  Hooves
Foal          ¦-  #5  Tail
Pony          ¦-  #6  Fetlock

(in addition, the copied subtasks have identical titles, but that's another issue)
