説明

When I copy tasks with subtasks, the changed properties are applied only in the parent tasks.

Environment:

Redmine version	2.2.3.stable
Ruby version	1.8.7 (i686-linux)
Rails version	3.2.12
Environment	production
Database adapter	MySQL

Redmine plugins:

redmine_impasse	1.2.2
redmine_screenshot_paste	2.1.0
redmine_wiki_extensions	0.6.2
redmine_wiki_lists	0.0.1

journals

+1

More details from #27864:

often I copy issues across versions. My issues have a lot of subtasks.
It would be useful if when I set, for example, version or status on parent issue the same are set on the subtasks.
Without this I must modify them afterwards, and this is not always easy.

OK,
now we are two waiting for this important enhancement.
Hope soon

Alessandro
