Branch: 2.3-stable
Revision: 11981

This patch can make issues in Roadmap viewer more readable. It make parent and son issues like following:

Parent   Issue
     Son   Issue
          Grandson   Issue

Through this, you can see the hierarchical relationships of parent and son issues.

journals

What about cross-project parent-child relations (#5487)?

Mischa The Evil wrote:

I never used that feature, and I find this patch can not support this feature after doing some tests. So sorry about that. I need some more time to fixed it.

+1

Some problem existed in this path, so I fixed it. You can try this patch in "the attachment":
