Attachment filesizes are displayed to 3 decimal places which is highly unusual. I'm using Redmine 2.3.2.
This seemed to be introduced with one of the latest updates...

I would suggest to display filesizes with 2 decimal places again.

journals

This behaviour was introduced with r9782 (1 => 6 decimal places) and changed by r9794 (6 => 3 decimal places) when redmine core team worked on issue #11118

I would suggest to display filesizes with 2 decimal places, as this seems more convenient to me.
