説明			
The overwritten <u>mail</u> method (<u>ActionMailer::Base</u>) in source:trunk/app/models/mailer.rb should return a <u>Mail</u> object instead of a symbol (the locale set/returned by <u>set_language_if_valid</u>) to be compliant with the original <u>mail</u> method.			
journals			
The patch broke a test. I've fixed it and added a test in r12210, thanks.
