説明

Editing and saving a custom query in an issues context, that has been created in a gantt view with rendering options, leads to the loss of the saved gantt rendering options.

STR:

create a new custom query in a gantt context with rendering options

switch to the issues view

click edit to modify the query

now the gantt rendering options aren't displayed

click save to save the query

Expected: the in step one saved gantt rendering options are preserved, despite that the options weren't displayed in the form in step three.

Seen: the saved gantt rendering options are lost during saving in step four.

Environment:

Environment:

Redmine version2.3.3.devel.12228

Ruby version2.0.0-p247 (2013-06-27) [i686-linux]

Rails version3.2.13

Environmentproduction

Database adapterMysql2

SCM:

Subversion1.6.17

Git1.7.9.5
