説明 In IssuesController , "build_new_issue_from_params" method is called when status is changed. (set in before_filter for update_form action) build_new_issue_from_params has the following line: @allowed_statuses = @issue.new_statuses_allowed_to(User.current, true) the second parameter , being always true , causes IssueStatus.default to be pushed to the allowed_statuses. I think this is a bug.			
journals You're right, default status should be proposed for new issues only. It's fixed in r12277. Merged.
