説明

Some ideas to improve assignee list ergonomoy.

- When you have a ping-pong exchange with assignee update at each step, it could be great to have the last assignees in the beginning of the list.
- When you have a lot of accounts, it could be easier if users are displayed by group, select should be replace by an accordeon or something like this.
- A specific group should be put in first, this should be set project by project.
- Replace select by an input text with Autocomplete or similar
