説明

Is there any way the "Activity" can be added into a "Projects / View all issues" Custom Report?

We need to invoice at the end of the month and set the Activity to Chargeable or Non chargeable
It would seriously help if the Activity field would display in our Custom Reports.

If this is not possible is there any other way to work around this problem?

Thank you.

journals

Does the report/querying available in "Projects / Overall spent time" solve this? You can add activity in the report tab.

https://your_redmine_host/time_entries/report

Thank you for the information.

The main reason for not using this page was there was no save option. The other problem with this page is there are two tabs
Details / Reports. Our accounts person needs to the details page with the ability of "status" so we only invoice out closed jobs of the
past month.

I hope I have not overlooked something. Please let me know if I have.

Thank you again!
