Currently the Versions are not grouped according to the projects version inherited.
Can you please show this combo as grouped.

Thank You.

journals

+1.
This is really good imporvement for shared projects where users hard to pick a target from long list.
Hope you can implement this soon or give a clue to fix this.

thanks!

FTR.

According to #9850#note-19, r16194 (#23265) prefix project name at version-format custom field in issue list.
