説明

It looks like the function `formatted_value` in `source:/trunk/lib/redmine/field_format.rb` accepts a parameter `html`, but never uses it. Custom fields with a url pattern present are always returned as links.

Example Custom Field "External Link":

Format: Integer

Name: External Link

Link values to URL: @[@https://support.example.com/tasks/%value%@](https://support.example.com/tasks/%value%)

Display in notification email:

External Link[26215](#)

Environment:

Redmine version	2.5.0.stable.12954
Ruby version	1.9.3-p448 (2013-06-27) [i686-linux]
Rails version	3.2.17
Environment	production
Database adapter	Mysql2

journals

Attached patch uses `html` parameter to produce expected output.

field_format.rb (revision 12954)

Fixed in r12967, thanks for pointing this out.

Merged.
