説明

When changing a ticket ID of a time tracker entry an error message about invalid ticket ("Ticket ist nicht gültig") show up.

Although the correct ticket title gets shown.

Steps to reproduce:

1. Create a time tracker entry for some ticket
2. Use the "My page" view to edit the created time tracker entry
3. Change the ticket id to another valid ticket

Screenshot attached

journals

This bug only exists since upgrading to 2.5.0

I guess it only happens when the ticket chosen in step 3. is not in the same project as the original ticket, right?

Fixed in r12990.

Merged.
