説明			
Suppose I have a task (Task1) with two subtaks, Sub1 and Sub2 and Sub1 preceeds sub2. If I copy Task1 with subtask, the relation between the subtask aren't copied to the new ones.			
journals			
I Created a patch against 3.4 stable to implement copying subtask interrelations. It applies cleanly to master. I have been unable to test on master yet due to issues with updating rails (dependency problems for actionpack-xml_parser. Ill do this if I ever get time allotted to continue upstream effort, but as I am doing this as part of my (very busy) day job, I doubt that will happen any time soon, so if anyone wants to take this patch and test it on master, I would be grateful. This patch is currently working fine on our live 3.4 server.
