説明 I configured Redmine to use markdown for text input. On my main wiki page, I added a link: [API](api) Which renders to: <pre>@API@</pre> But when I'm on the main page, it points to projects/PROJECT/api instead of projects/PROJECT/wiki/api, thus giving me a 404 when clicked. Environment: <table><tr><td>Redmine version</td><td>2.5.2.stable</td></tr><tr><td>Ruby version</td><td>2.0.0-p353 (2013-11-22) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>3.2.19</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table>				Redmine version	2.5.2.stable	Ruby version	2.0.0-p353 (2013-11-22) [x86_64-linux]	Rails version	3.2.19	Environment	production	Database adapter	Mysql2
Redmine version	2.5.2.stable												
Ruby version	2.0.0-p353 (2013-11-22) [x86_64-linux]												
Rails version	3.2.19												
Environment	production												
Database adapter	Mysql2												
journals													
I see the same behavior with Redmine configured to use the ckeditor plugin for text input. Environment: <table><tr><td>Redmine version</td><td>2.5.2.stable</td></tr><tr><td>Ruby version</td><td>2.0.0-p353 (2013-11-22) [x86_64-linux]</td></tr><tr><td>Rails version</td><td>3.2.19</td></tr><tr><td>Environment</td><td>production</td></tr></table> Database adapter PostgreSQL Looking a little further, this behavior doesn't seem to persist if you rename the Start page to something other than Wiki. But you need to leave the Start page as "Wiki" in Settings=>Wiki for the project or it breaks again.				Redmine version	2.5.2.stable	Ruby version	2.0.0-p353 (2013-11-22) [x86_64-linux]	Rails version	3.2.19	Environment	production		
Redmine version	2.5.2.stable												
Ruby version	2.0.0-p353 (2013-11-22) [x86_64-linux]												
Rails version	3.2.19												
Environment	production
