説明 Hello, I would like to propose a feature for redmine: -the possibility of disabling internal authentication after adding a ldap server. Martin Denizet was kind enough to provide a solution here, but maybe someone could port it into the main trunk of redmine so it could be a feature in future versions: http://www.redmine.org/boards/2/topics/42903?r=42951#message-42951 Thank you, lancu
