説明 When I follow the instructions at http://www.redmine.org/projects/redmine/wiki/HowTo_keep_in_sync_your_git_repository_for_redmine and point the repository to the just mirrored git repo, I get a Redmine 500 error, with the following in the production log: <pre>@NoMethodError (undefined method downcase' for nil:NilClass): app/models/changeset.rb:100:in scan_for_issues' app/models/repository/git.rb:218:in save_revision' app/models/repository/git.rb:207:in block (2 levels) in save_revisions' app/models/repository/git.rb:204:in block in save_revisions' app/models/repository/git.rb:203:in each' app/models/repository/git.rb:203:in save_revisions' app/models/repository/git.rb:153:in fetch_changesets' app/controllers/repositories_controller.rb:114:in `show'@</pre>			
journals Environment: Redmine version 2.5.1.stable.13174 Ruby version 2.0.0-p481 (2014-05-08) [x86_64-linux] Rails version 3.2.18 Environment production Database adapter Mysql2 SCM: Subversion 1.8.8			
Git 1.9.1			
Log says Setting.commit_ref_keywords is nil. source:tags/2.5.2/app/models/changeset.rb#L118 It seems your Redmine installation is broken. Toshi MARUYAMA wrote: It seems your Redmine installation is broken. It's a fresh install... Just updated (via "svn update") to 2.5.2.stable.13410 and still the same problem. How is my installation broken?			

I guess that settings table has NULL value when name = 'commit_ref_keywords' or your config/setting.yml is broken.
Because, if settings table doesn't have row when name = 'commit_ref_keywords', Setting.commit_ref_keywords returns value of commit_ref_keywords.default in config/setting.yml

Hello Masato NODA and Tristan,
I have same problem in one of two redmine systems only when I connected HTTPS subversion.
The db table had a value "refs,references,IssueID" for name "commit_ref_keywords".

working system's environment:

Environment:

Redmine version 2.5.1.stable
Ruby version 1.9.3-p231 (2012-05-25) [i386-mingw32]
Rails version 3.2.17
Environment production
Database adapter Mysql2
SCM:
Subversion 1.8.9
Git 1.9.0
Filesystem

Redmine plugins:
no plugin installed

System not working:

Environment:

Redmine version 2.5.2.stable
Ruby version 2.0.0-p481 (2014-05-08) [i386-mingw32]
Rails version 3.2.19
Environment production
Database adapter Mysql2
SCM:
Subversion 1.8.10
Git 1.9.4
Filesystem

Redmine plugins:

clipboard_image_paste 1.8
issue_id 0.0.1b
redmine_agile 1.3.3
redmine_code_review 0.6.3
redmine_didyoumean 1.2.0
redmine_hudson 2.1.2
redmine_monitoring_controlling 0.1.1
redmine_wiki_lists 0.0.3

sidebar_hide 0.0.7
