説明 Several posts on the forum are about the need of mirroring issues, ie auto updating the status of related issue. This is an attempt to achieve this result by creating a new relation (two in fact...) called mirror. The drawback is that callbacks are not properly handled : these patch are not a finished product. Provided patchs are for the 2.3.0 version, but can easily be transposed for the 2.4 or 2.5 series. Files to be patched : app/models/issue.rb app/models/issue_relation.rb config/locales/fr.yml (ok, for french people....) journals Related to issue #11316 related_issues relates,Reopened,11316,Automatic update of related issues
