説明 I a ticket has subtasks: It would be very helpful if the subtasks are grouped relating to the main task. Even mor better: a small hint in css attribute about subtasks-depth. There is already a css class "child" in general. • Main Task <== can be done by css "parent" +--Subtask 1 <== can be done by css "child" +--subtask 2 Now it looks like +--subtask 2 • Main Task +--Subtask 1
