**説明**

If an image is added to an issue without any comment it is not shown in the activity view. Notification emails work as intended.

journals

Duplicate of #3114.

That duplicate does not describe the problem. I do not want to show the image in the activity view. There should be a notice that an image has been added. Instead there is nothing.

#18156#note-2

For now, only status changes and notes are added to the activity. No entry for when a file is added.

I am not sure but isnt that a bug? The activity label indicates that every activity (if select on right side) is mentioned. Eg. in our team we are not using mail notifications and had a lot of confusions because of that missing functionality. Are there more activities that are not mentioned on that page?
