**説明**

Currently there is a hard limit of only 10 attachments per change of an issue. It would be nice if this was configurable or removed completely if possible.

I'm wondering if there was a specific reason why this limit was added in the first place.

Related Issue: #18555, #8579

This is the code in question: `source:/trunk/public/javascripts/attachments.js#L6`

journals

I wanna politely remind of this.

Here is my rough first attempt at changing this. I'm running redmine 3.3.1 so the patch would need some updated to apply to latest.

I also would like to bump that feature.

Jonathan Cormier Increasing max files number works, but notification not (redmine 3.4.4)

Changing for 3.4.4 didn't take much. Error message code didn't change at all. Works for me

This what firefox console shows

Your syntax error indicates that there is some bad code on line 170. If you open firefox's inspector, select Debugger and find the attachments.js file. Look at line 170. Maybe you mistyped something, missed a parenthesis or bracket...

You are totally right, my bad. I have copied plus signs from diff file :)

+1 for this feature.

It wouldn't be so bad if inline images didn't have to be "attachments" - many of our issues will have screenshots / captures to go along with them. I know we could "zip" and package them up, but it is useful to see them as inline images.

Does anyone know if this change to attachments.js could be done via a plugin?

+1 we run into this issue all the time. Issues end up with lots of screen captures in them, so there are multiple edits required to add all the content.

+1 this should be core feature.

I am also looking for this feature.

Note: attachments\_3.4.4\_increase\_number\_upload\_files.diff still applies cleanly in redmine 4.0

Configurable attachments limit has been implemented in this plugin: [http://www.redmine.org/plugins/that\\_attachments\\_limit](http://www.redmine.org/plugins/that_attachments_limit)

It works on Redmine 3.4 and Redmine 4.0 (and, maybe, others).

That's great. I really wish this could be integrated into redmine.

Andriy, now that the show error message has been accepted, I assume it would be something that could be added to your plugin easily?

<https://www.redmine.org/issues/18555>

+1 for this feature.

We run in this issue quite a lot. Especially with the DMSF-Plugin as we quite often upload more than 10 files. If you have 11 or 12 files you easily miss that only the first 10 files have been uploaded...
