説明

@rbpdf.png@: This is the default export. There is no visible left padding in the generated PDF. This leads to pretty ugly PDF tables.

```
# /usr/lib/ruby/gems/1.9.1/gems/rbpdf-1.18.2/lib/rbpdf.rb
```

```
3814 starty = @y
3815 if autopadding
3816   # Adjust internal padding
3817   if @c_margin < (@line_width / 2)
3818     @c_margin = @line_width / 2
3819   end
3820   # Add top space if needed
3821   if (@lasth - @font_size) < @line_width
3822     @y += @line_width / 2
3823   end
3824   # add top padding
3825   @y += @c_margin
3826 end
```

@rbpdf-with-left-padding.png@: Adding the following leads to a better left-padding default.

```
# /usr/lib/ruby/gems/1.9.1/gems/rbpdf-1.18.2/lib/rbpdf.rb
```

```
3814 starty = @y
3815 if autopadding
3816   # Adjust internal padding
3817   if @c_margin < (@line_width / 2)
3818     @c_margin = @line_width / 2
3819   end
3820   # Add top space if needed
3821   if (@lasth - @font_size) < @line_width
3822     @y += @line_width / 2
3823   end
3824   # add left padding
3825   @x += @line_width * 2
3826   # add top padding
3827   @y += @c_margin
3828 end
```

journals

I am trying to add export PDF option on one of the plugin screens. Can you help me where all i need to change to make it work?

I have created issue.

<https://github.com/naitoh/rbpdf/issues/7>

This problem fixed by rbpdf 1.18.5.

please bundle update

bundle update rbpdf

!rbpdf-1.18.5.png!

Required rbpdf 1.18.5 in 2.6-stable r13987, thanks.
