説明

This patch adds new access keys, 'p' for a previous issue link and 'n' for a next issue link.

With this, we can quickly move to a previous/next issue. Especially useful when we look one after another a issue.

journals

Maybe we could add these access keys to all paginations?

Thanks for the feedback. I'll try it.

Here's a new patch. Assigned 'p' and 'n' access keys to the following links.

- paginations
- previous/next links of issues/show, activities/index, repositories/revision, gantt/show
- previous/next month links of calendar/show

Patch committed in r13794, thanks!

I'm glad to see the patch has been accepted. Thanks.
