説明 Hello, On the page http://www.redmine.org/projects/redmine/wiki/RedmineTextFormatting it says that for including a wiki page one should use this syntax: {{include(Foo)}} This does not work. But without '!' sign it does: マクロ include の実行中にエラーが発生しました (ページが見つかりません) I think it's a typo. We use Redmine 2.5.1, but I do not see anything considering include functionality in the changelogs from 2.5.1 up to 2.6.1. Thanks!	
journals This actually has been a long-standing - but never noticed/reported - issue (consisting of escaping typos, I think, as the prepended exclamation mark is used to escape textile markup) within the macro descriptions as [[RedmineTextFormatting]] is using the !{{macro_list}} macro to display the list of buildin macros and their descriptions. This has been fixed in r13955 (which also fixes #18961), which will be included in version#89. @Jean-Philippe: I'll assign this issue to you, the same way as you did with #18961, since r13955 still needs to be merged. Thanks for pointing this out. This will be fixed when I'll upgrade redmine.org.
