説明

This is related to user-based or role-based settings such as the "Email notifications" in "My account" and the "Issues visibility" in "Roles and permissions".

If there are other settings that I have overlooked, then this should also apply to those cases as appropriate.

h2. +Overview+

Propose that these settings ("Email notifications" in "My account" and the "Issues visibility" in "Roles and permissions") be changed to a checkbox format, so as to allow more resolution/flexibility.

i.e.,

h2. +Email Notifications+

h3. +Current+

!2015-02-02_14-44-37_Myaccount.png!

h3. +Proposed+

In the form of checkboxes or similar execution:

☐ Events ☐ Projects |

☐ For things I watch | ☐ For all my projects |

☐ For things I am assigned to | ☐ For selected projects only |

☐ For things I am an owner of | | |

This also eliminates the need for "For all events" and "for events I'm involved in" because selecting a combination (or all) of the options from the "Events" options is equivalent.

h2. +Issues Visibility+

h3. +Current+

!2015-02-02_14-46-08_Roles.png!

h3. +Proposed+

In the form of checkboxes or similar execution:

☐ Issues |
☐ Private Issues |
☐ Issues Created by User |
☐ Issues Assigned to User |
☐ Issues Watched by User |

These options are a step in the right direction to provide much more flexibility to the users for those particular settings (and potentially others that I may have missed).

h2. +Ideal/Wow+

Another option (ideal?) would be to allow multiple permutations of the selections per User or per Role.

e.g.

being able to select multiple email notification settings such as:

"For things that I watch; for selected projects (project1, project2)"

"For things I created; for selected projects (project2, project3)"

"For things I'm assigned to; for selected all projects"

for a single user.

This could be achieved with a "add/remove" new rule type of method.

journals

loosely related to #17500?

sorry about typos. (to help curb typos on redmine.org, support #19004 !)

James H wrote:

sorry about typos.

What are typos?

I cannot find.

Cant tell if serious...

but a typo is a typing mistake of any kind, such as bad spelling or just any mistake in general. =)

I know typo meaning.

I cannot find typos in your description.

What typos in your description?

Ohh.. like:

"This is related to -settings- user-based or role-based settings"

should be:

"This is related to user-based or role-based settings"

Not sure if there are more in this issue, its been a little while since I posted this, but I do make typo mistakes here and there in my issues.

Fixed, thanks.
