**説明**

We've installed new version of Red Mine recently. Before that we had possibility to move issues between different projects while editing it. Now we can't move them -- there is no Project combo-box (see 2.png) . Check box "Move issue" diapered from Roles and permission menu(see 1.png).

Environment:

|                  |                                        |
|------------------|----------------------------------------|
| Redmine version  | 3.0.2.stable                           |
| Ruby version     | 2.0.0-p645 (2015-04-13) [i386-mingw32] |
| Rails version    | 4.2.1                                  |
| Environment      | production                             |
| Database adapter | Mysql2                                 |

SCM:

|            |        |
|------------|--------|
| Subversion | 1.8.11 |
| Git        | 1.9.5  |
| Filesystem |        |

Redmine plugins:

|                       |      |
|-----------------------|------|
| clipboard_image_paste | 1.10 |
|-----------------------|------|

journals

Moving issues is now defined in Workflow - Field permissions (#3521).

If field project is read-only (for certain role and certain status), issues can not be moved.

Thanks

pls fix it online documentation

Just a quick-ref for the correct history of the changes observed by the OP: #18855.
