説明

foo="bar"

The above was not entered with a trailing space yet the pre block processing added one.

Oddly, no extra trailing space added for those:

```
foo="bar"  #  comment
test=ok
```

So something special happens when a " ends a line.

Reproduced on Redmine 3.0.4 with Firefox 39 and Chrome 43. This was observed long ago so it's not a regression recently introduced.
