説明 I think it would be interesting to be able to use both functionality : • Use the issues field • Use the issues status !img1.png! I would like to use the issues status to set at 0% new tickets and at 100% closed tickets. But I want for example to leave the choice for others status (use issue field). journals It's a feature, sorry. I can't modify tracker field. François Polubinski wrote: It's a feature, sorry. I can't modify tracker field. Changed.
