説明

Using a table instead of an unordered list to show numbers of issues in "Issue tracking" box brings the following advantages.

- neatly organized information is easier to understand.
- we can directly move to specific information (open features, closed bugs, ...) by clicking numbers.

+1

If you're going to implement this consider adding a small visualization. E.g. a colored bar in another column for each row. Or something like that. It would be nice to get a fast overview.

Could this be committed?

Committed in r14640 with link on tracker name removed (same as open count link).

Thank you for merging the patch!

Committed in r14640 with link on tracker name removed (same as open count link).

I think that link on tracker names is required for consistency with "issues summary":

<http://www.redmine.org/projects/redmine/issues/report> . And sometimes open count link is a little bit hard to click when the number is small (for example: 1, 2, ... 9).

"label_x_open_issues_abbr_on_total" is no longer used since r14640. Please apply attachment:remove-label_x_open_issues_abbr_on_total.diff to remove it from config/locales/*.yml.

Done.
