説明

In wiki export to pdf, there is no way to indicate that the header has to be repeated on every page.

!Table_wiki.png!

If found this, but it doesn't work with Redmine:

<http://txstyle.org/doc/15/tables>

2) HTML5 requires the use of a tag. A

tag is optional.

The tag is added when `!<table>` above and `!</table>` below the heading are used.

```
!<table>
!<tr><th>First Header</th><th>Second Header</th></tr>
!<tr><td>Content Cell</td><td>Content Cell</td></tr>
!<tr><td>Content Cell</td><td>Content Cell</td></tr>
!</table>
```

The

tag is added when `!<table>` above and `!</table>` below the footer are used.

```
!<table>
!<tr><td colspan=2>A footer, centered & across two columns</td></tr>
!<tr><td>Content Cell</td><td>Content Cell</td></tr>
!<tr><td>Content Cell</td><td>Content Cell</td></tr>
!</table>
```
