説明			
<p>Although CSS class 'overdue' on issues was implemented by #2337, default application.css does not highlight overdue issues yet except for gantt.</p> <p>This patch makes overdue issues and private issues clearly distinguishable in issue list.</p> <p>!issues-list.png!</p> <p>!issue-detail.png!</p> <p>journals</p> <hr/> <p>I agree on displaying the due date in red on an issue that is overdue (second screenshot).</p> <p>But for the issue list, I don't know. I find it confusing to have almost the same color the 2 really different things (overdue/private). And some people only use private issues in their projects, that would make a lot of red on the issue list.</p> <p>Thanks for reviewing this.</p> <p>But for the issue list, I don't know. I find it confusing to have almost the same color the 2 really different things (overdue/private). And some people only use private issues in their projects, that would make a lot of red on the issue list.</p> <p>Updated the patch. Like private note, red border on the left. Private and overdue are clearly identifiable.</p> <p>!issues-list-v2.png!</p> <p>r14732 displays the due date in red on overdue issue details.</p> <p>Styling the issue list is a nice thing but it's not easy to find something that is OK for most people. I personally wouldn't like to have all overdue issues displayed in red on the issue list.</p>
