説明

I apologize if I'm not submitting this correctly.

Here're the system details:

Environment:

Redmine version 2.6.1.stable

Ruby version 2.0.0-p594 (2014-10-27) [i386-mingw32]

Rails version 3.2.21

Environment production

Database adapter Mysql2

SCM:

Subversion 1.8.10

Git 1.9.5

Filesystem

Redmine plugins:

no plugin installed

We have found that when more than one person tries to edit an issue at the same time, we experience a loss of data. I couldn't find any report of this in the known bugs list, or any mention in the FAQ. I did a general search as well, and the only similar issue was for a wiki problem. #2876

journals

Please describe more details.
