説明 See RedmineTextFormattingTextile, "Links to Repository files". Quotes should be used only around file names, so it can contain <u>at</u> and <u>hash</u> symbols. @source:"some file@52#L120"@ → @source:"some file"@52#L120@ @source:"repo_identifier some file"@ → @source:repo_identifier "some file"@ journals I think this is not a defect but a feature request.
