説明 When your LDAP Administrator password has expired the LDAP connection test pass when all the LDAP users aren't able to login. Workaround: renew the LDAP Administrator password (or the user used to integrate with redmine) or set the password noexpiry option Tested with: Redmine version 3.1.1.stable Ruby version 1.9.3-p551 (2014-11-13) [x86_64-linux] Rails version 4.2.4 LDAP SAMBA 4 in AD mode			
journals The LDAP test will also pass when the credentials were completely wrong. This is probably related to #4483
