説明
Hey,

I am getting the following error page when trying to add the attached response to the linked forum topic:
message#49303

journals
Seems to be related to the web UI trying to use a specific response ID.
Creating a new response with content "test", editing that response to contain the originally intended text worked.

I think it is due to high load.

Getting the same issue when trying to add another response to the same topic...

Still getting the same issue when trying to add another response to the same topic...

I'm facing the same problem trying to comment my post here: <https://www.redmine.org/boards/2/topics/57233?r=57235>

Can this be related to the title including a "(" or ")" digit?

Just a coincidence?
