説明 Hi all I am a new user of redmine, we have an request, do anybody know how to add an URL link in the export excel file when we do the export!, just like the attach picture below. thanks!			
journals This is not a redmine feature but the alternative is that you can edit an cell like '@=HYPERLINK(" <a &a1.a1"="" href="http://path/to/redmine/issues/">@' at another column in the excel file.
