説明

When uploading a CSV file to import, the delimiter used in the CSV is supposed to be auto-detected.

However, "@File.read@":<http://ruby-doc.org/core-2.2.0/IO.html#method-c-read> seems to not be used properly: The third parameter may not be a string.

This is rescued in the block and therefore, the user does not see the error. However, the auto-detection does not work.

Attached is a simple patch that fixes this.

journals

Thanks for the patch. Setting target version to 3.2.2.

Committed, thanks.
