説明 env ruby 2.1.5p273 (2014-11-13 revision 48405) [x64-mingw32] redmine 3.2.2 stable general_pdf_fontname: freesans no plugins Can't properly export czech characters to pdf since Redmine 3.2.0 example: p ř ěliš žlu ť ou č ký k ů ň Forcing previous version of rbpdf gem fixes the issue gem "rbpdf", "1.18.7"			
journals I cannot reproduce on Redmine 3.2.2 ruby 2.1.10p492 (2016-04-01 revision 54464) [x86_64-linux]. I found out that it's browser related. Adobe Acrobat - both pdfs are correctly encoded TWINUI (windows) - 1.18.7 (ok), 1.19.0 (wrong)
