説明

Redmine hides this email in markdown:

But it doesn't hide this:

journals

<https://github.com/vmg/redcarpet/issues/402>

The latest version of Redcarpet still have this problem (we upgraded Redcarpet to 3.4.0 in r16583).

Redmine is not affected by the respective issue because we have @no_intra_emphasis: true@ and the emails with _ are recognised correctly. Please see the below screenshot.

The issue with @@ looks to be from the same Redcarpet gem, the text is filtered out because it is recognised wrongly as HTML tag.

!markdown_emails.png!

Rails console:

With @:filter_html => true@:

```
irb(main):012:0> Redcarpet::Markdown.new(Redmine::WikiFormatting::Markdown::HTML.new(:filter_html => true, :hard_wrap => true), autolink: true, no_intra_emphasis: true).render("")
=> ""
```

With @:filter_html => false@:

```
irb(main):013:0> Redcarpet::Markdown.new(Redmine::WikiFormatting::Markdown::HTML.new(:filter_html => false, :hard_wrap => true), autolink: true, no_intra_emphasis: true).render("")
=> ""

\n"
```
