説明 If the user list is quite long, it can be very time-consuming to find the right person when opening the "assigned to"-combo box when editing an issue. I suggest to show the users that are likely to be chosen at the top of the list. Ideas for defining "likely to be chosen": • user was assignee in the past • owner of the issue • watcher of the issue Or even more esoteric: • activity of user in the project • how often is the user choosen as assignee of the current assignee • ...
