説明 When an issue or feature request has its status changed, especially to status "rejected", comments are very helpful but are often omitted. Could it be implemented, so that a status change requires the comment field to be filled?			
journals			
We use the custom workflow plugin to accomplish this, which lets you add simple scripts that execute before or after save to add custom behavior such as this. "Plugins Directory » Custom Workflows": http://www.redmine.org/plugins/custom-workflows Thanks for the hint. I will take at a look at the plugin.
