When editing a issue description with extensive content, the vertical dimension of the field is greater than the Browser page, causing a double scroll, which greatly hinders the use of the editor.

For example , I'm putting a text at the end of the description of this issue , which will cause double scroll informed.

-

journals

This should be fixed by r15884. The rows of the textarea will now vary between 10 and 20 (instead of 100).
