説明

I contribute it for the first time

I expect a new feature

In the Gantt chart I'd like to add a new row function sequentially same as a ticket tab by order

journals

We can reorder issues in "Issues" page by clicking header column.

Is it correct that you want to reorder issues in Gantt page in the same way? (showing more column other than subject and reorder issues in gantt by clicking the header).

Thank you, Go Maeda

It's Correct

The method does not matter. but for example, the method that add a check box in option.

+1

If this feature is realized, I think the Gantt chart will be easier to use.
