説明

Sometimes we have lot of custom fields. It will be very handy to be able to add some custom field grouping.
Easier thing IMHO can be just another type of custom field (Group), so it will just display horizontal line with name of group.
Like can be the same which divides ie custom fields from Subtasks and Related issues in ticket header.
Optionally, display name of group can be really nice.

journals

PS: If needed, I can add some sketches...

+1

I need this urgently! Thank you!
