説明 Now it looks smoother with only one additional div. It would be nice, if someone can attach screenshot.			
journals Screenshot after the patch applied: !screenshot-24827.png! Go Maeda, Thanks!			
Just my two cents on this: I'd like to have some more feedback on this if it was up to me to decide on this issue. I'm not quite sure if this fits the taste of the majority of the users. It's IMHO in that way much better than #25068, but then still... Indeed, more feedback would be welcome about this change. By surrounding the box with lines I can see the separation between versions clearly. I think this change is good. I like white background better than gray background. example: !{width: 70%; border: 1px solid #ccc}screenshot-2.png!
