説明

Issue #8562 limited the watch list when creating new issues to < 20. After upgrading to redmine 3.3 from a fairly old version which was before this change, our users have been complaining they aren't seeing the checkboxes for the watch list.

I understand why a limit was introduced but 20 is too low for us and it seems like this should be configurable.

This wouldn't be as big a deal if the modal "Add watchers" window wasn't so difficult to use. I often find myself checking people off, then searching for someone I'm missing only to have it clear all the people I just checked.

Environment:

Redmine version	3.3.1.stable
Ruby version	2.1.9-p490 (2016-03-30) [x86_64-linux-gnu]
Rails version	4.2.7.1
Environment	production
Database adapter	Mysql2
