説明

Hi ! At my job we have event on last friday of each month : We contribute to the project that we want. My choice was Redmine because we use it a lot in the company.

My feature request is very simple : On the Redmine's Redmine (redmine.org), having a test string custom field on the User model, so I would be able to write the company that I work for in my profile.

Thank you very much and have a great day !
