説明 the @@@languages_lookup@ variable in @redmine/i18n.rb@ appears to be intended as a cache but is assigned to a new value everytime @find_language@ is called. Attached patch fixes this by using @ =@ instead of @=@. journals Since @find_language@ method is called on every request, I think caching values is reasonable. Setting target version to 3.4.0. Committed, thanks for the fix.
